Integrations - Integrations that significantly lower the effort to fill DSpace with content, both from in house systems and third party content

Title (Goal)	Content from both in-house systems ands third party platforms should be auto ingested into DSpace
Primary Actor	External System
Scope	
Level	
Story (A paragraph or two describing what happens)	When researcher Pete finished his paper, he submits it to a system other than the institutions DSpace repository. Although it was never formally submitted to it, Dspace harvests al content from the platform. By doing so Pete's research becomes available for all users of the institution's DSpace repository.
