

Integrations - Integrations that increase the exposure of content stored into DSpace in external systems

Title (Goal)	Content that is stored in a DSpace repository should be more exposed through external systems
Primary Actor	External System
Scope	overall system
Level	high level summary
Story (A paragraph or two describing what happens)	Pete submitted his research paper to DSpace. Mary, who is not a DSpace user can also access Pete's paper. She has access to it through an other platform (which also may be an in-house one or a third-party system). The system Mary is using simply harvests the content from Pete's Dspace.
