

Integrations- Integrations that avoid registering information multiple times within the organisation

Title (Goal)	within an organisation, it should never be required that a person needs to fill in the exact same information multiple times
Primary Actor	Human
Scope	overall system
Level	high level summary
Story (A paragraph or two describing what happens)	When Pete wanted to submit his research paper, he filled in all his metadata once in one of the organisations systems. After the submission all platforms his organisation uses collected that metadata. In this way his research was automatically added to all platforms. So Pete does not have to add his research separately to his organisational resumé, the repository, etc.
