    - _Unable to locate Jira server for this macro. It may be due to Application Link configuration._.
  - Today:
    - _Unable to locate Jira server for this macro. It may be due to Application Link configuration._ and other Sonar
  - No blockers.
- Nianli
  - Yesterday:
    - I setup Java 8 on another machine, and built javadoc for fcrepo-oaiprovider, but have errors.
      - I found why it succeeded on java 7 and failed on Java 8, the reason is in Java8, javadoc is stricter on the requirements.
      - So we have two choices: 1. fix the errors 2. disable the strict checking in pom.xml. I tried the second way, it works.
  - Today:
   - Trying to fix the errors instead of disabling strict checking in pom.xml
- Osman

- Yesterday:
  - Did some work for [Unable to locate Jira server for this macro. It may be due to Application Link configuration.].
- Today:
 - In the process of submitting the PR.
 - Will work on the other ticket after i'm done.
- Blockers: none

02/13

- Yinlin
  - Yesterday:
    - Finish [Unable to locate Jira server for this macro. It may be due to Application Link configuration.] and submit PR-71?
    - Finish [Unable to locate Jira server for this macro. It may be due to Application Link configuration.] and submit PR-71?
  - Today:
    - [Unable to locate Jira server for this macro. It may be due to Application Link configuration.]
