 - Yesterday:
 - I was working on Unable to locate Jira server for this macro. It may be due to Application Link configuration.
 - I deployed the wa
 - I did see the errors as report at first time. But I don't have performance issue on federated files. Details I will put in JIRA comments.
 - The interesting thing is the error gone after I turned the log to debug mode for fcrepo.log.http.api.
 - Today:
 - I will continue working on this JIRA issue.
 - Help/Blocker:
 - Please help on StreamingBaseHtmlProvider.java line 237, have error: Exception rendering #parse(views/common-metadata.vsl) at /views/node.vsl[line 37, column 13] . But use debug setting in logback.xml, error disappeared,

 - My mac sometimes cannot build passed using mvn clean install.
 - Spent half day on this issue but still can't make it work.
 - It was build fine time from time, my assumption was memory issue or underline OSX update.
 - Post to IRC but seems no one have similar issues.
 - My work around for this issue was using another Ubuntu to build.
 - My department has agree to upgrade the memory so it should be fine then.
- Jared
 - Yesterday:
 - Finished (hopefully)
