

2015-03-12 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: [11:00am Eastern Standard Time US \(UTC-5\)](#)
- U.S.A/Canada toll free: 866-740-1260, participant code: 2257295
- International toll free: <http://www.readytalk.com/intl>
 - Use the above link and input 2257295 and the country you are calling from to get your country's toll-free dial-in number
 - Once on the call, enter participant code 2257295
- IRC:
 - [Join the #duraspace-ff chat room via Freenode Web IRC](#) (enter a unique nick)
 - Or point your IRC client to #duraspace-ff on irc.freenode.net

Attendees

- [Unknown User \(acoburn\)](#)
- [Unknown User \(escowles@ucsd.edu\)](#)
- [Michael Durbin](#)
- [A. Soroka](#) ★
- [Yinlin Chen](#)
- [Jared Whiklo](#)

Agenda

1. Islandora/F4
2. Fedora 3 to 4 Upgration
3.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

 t non-repository subjects (see

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

)
4.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

5. ...

Minutes

1. Skipped for lack of Islandora representatives.
2. [Michael Durbin](#): In discussion with [Benjamin Armintor](#) about Columbia's migration. Hope to learn from the experience and integrate any Columbia-sourced work into the migration tools. Tickets proceeding apace
3. Summary
 - a.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

 : non-LDPC LDPRs: Use [Andrew Woods](#) put the and vigorously discussed,
 - b.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

 : Arbitrary-subject triples: containing arbitrary triples.
General agreement that much more discussion is needed to clarify the intent and scope of this kind of change. Some community RDF /linked data experts (e.g. [Rob Sanderson](#)) have opined against this.
 - i. [Jared Whiklo](#): The triplestore was externalized in Fedora 4 because there are better triplestores out there.
 - c. Server-managed triples: This is the desire to let clients of the repository control whether or not server-managed triples are in play for a given resource. There was general, if quiet, agreement that this seems like a good change to make.
4. Current tickets:
 - a.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

 and can be tracked here:

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

 Current expectation is th place
 - b.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

 migration-related ticket already mentioned as
