

Features

Status

Please see the [VIVO Roadmap Process](#) regarding features, community engagement in the roadmap process and the translation of features into release planning and sprint. The features on this page have been used in the VIVO roadmap process. Please continue to suggest features as we go forward.

This page has been created to capture suggested Features

During Working Group and other meetings, a wide variety of features are discussed and many times participants suggest VIVO features that should be implemented. This page provides a place to capture ideas for new features and can be used by anyone to add their suggestions. Note that just because you propose the feature doesn't imply that you have to be tasked with creating it.

Note that as of 3/17/2015 when this page was created it was seeded with data from the Task Force Recommendations because they are both closely aligned.

Proposing a feature **does not** commit you to leading it – please do share your ideas!

If possible please create a page for the designated feature which can hold the details of the feature and links to relevant JIRA tickets.

Name of Proposed Feature	Name of Person(s) Proposing the Feature	Date Proposed	List of individuals supporting the feature
ex. Standard Visualization Suite	Layne Johnson, Jonathan Markow, Jonathan Breeze	2015-02-03	In Progress
Linked Open Data — Let's define a strategy of how to have real LOD and link our VIVO's	Don Elsborg, Jing Wang	2015-02-12	Not yet
Dev Ops - 3-tier build, docker containers, unit tests, coding standards, code documentation	Patrick West	2015-02-13	Not yet
UI/UX - new default theme, usability studies (by role),	Patrick West	2015-02-13	Not yet
Documentation/Help - better documentation, tutorials, better search, use VIVO	Patrick West	2015-02-13	Not yet

[Don Elsborg](#) add proposed task force to table 13 Feb 2015
