

Integrations - Linking to other data sources search for available data

Title (Goal)	DSpace should automatically harvest linked metadata through other sources
Primary Actor	External System
Scope	overall system
Level	high level summary
Story (A paragraph or two describing what happens)	When Steve submits his research to the DSpace repository, it automatically gathers relevant metadata. The repository collects this data from several other sources. Metadata that wasn't filled in by Steve that is available on other sources is immediately added to the research's metadata.
