Minutes

1. Islandora / F4 migration update

- Notes available from Fedora 4 Interest Group call
- Services outline here
- Special Fedora 4 Interest Group call – Investigate XML editors to replace XML Forms
- migration-utils continues mostly all via ticket work

2. Audit sprint summary

- Second phase of audit spring wrapped up last week
- Packed in vagrant vm and send out to stakeholders for feedback
- Need to address to query functionality that people want
- Outstanding issues
    - handling the way fixity works
    - adding integration tests
    - generating event ids
    - request for handling event ids in rest api (synchronous even service)

3. Blank node issue (updating existing bnodes)

- We would have to have to build out extensive and error-prone infrastructure (as does a triplestore) to handle bnodes properly in all cases
- https://jira.duraspace.org/browse/FCREPO-1385
- Need to figure out how exactly to close that ticket
- Blank nodes were probably not the right tool to implement. Need a community discussion around this.

4. Next maintenance sprint (Java8 migration)

- https://jira.duraspace.org/browse/FCREPO-1399
- Need to figure out how to handle checkstyle with Java8

5. Modeshape namespaces are being exported by some jars

- fcrepo-kernel-impl
- fcrepo-connector-file
- TIME TO GIT BLAME!
