

2015-05-05 Implementation Documentation Meeting

Attendees

- [Violeta Ilik](#)★, [Brian J Lowe](#), [Jim Blake](#), [Benjamin Gross](#), [Alvin Hutchinson](#)
- (★) Indicates who will be taking minutes

Call Details

Call-in details: 2015-05-05, 2PM CT, Skype

Agenda

	Item	Time	Facilitator
1	Reviewing the responses gathered from listserv and emails	15 min	All
2	Best ways to proceed	20 min	All
3	Work on a same existing page and come up with improvements	5 min	All
4	Other items	5 min	All

Minutes

1. Reviewing the responses gathered from listserv and emails: Most of the raised questions already exist in the documentation one way or another but it is difficult to find. Examples of non existing information can be found - good example is "how to export all the triples from my VIVO to an NT file or a N3 file"
2. Best ways to proceed: Do we want to have a style guide for all pages (ex:wikipedia) and language that is more casual and conversational?
3. Work on a same existing page and come up with improvements: members agreed that it will be best if we all work on one same page and come up with our own way to improve it. At the next meeting we will compare the pages and discuss future steps.
4. Other items

Action Items from this meeting

- Everyone works on VIVO wiki page: [VIVO Data - what and from where](#) to come up with the most user friendly language and good content that is understandable by a newcomer.
