

VIVO Member Use Cases

In accordance with the [VIVO Project Charter](#), VIVO member organizations receive certain benefits including but not limited to identifying use cases and proposing features. While input from anyone is at all times welcome, member organizations have established channels for providing input through their representatives at bi-annual Leadership Group meetings, quarterly Leadership Group phone calls, task forces, and the VIVO standing working groups.

When adding use cases in this section, please include your organization in the title of the use case and follow the template indicated in the [VIVO Use Cases](#) introductory page.
