

Structure - Generated provenance for all added bitstreams

Title (Goal)	Provenance generated for all bitstreams
Primary Actor	System Administrator
Scope	
Level	
Story (A paragraph or two describing what happens)	<p>Provenance information is generated for submitted (manual or batch) items/bitstreams as well as added/removed bitstreams.</p> <p>Example: A user adds a new bitstream to an item. User does not want to manually create new provenance information (action, user, date, # of bitstreams, file names, bytes, checksums, etc.)</p>
