2. Summarize final state
3. Walk through in-process and unstarted tickets
4. Teeing up for next sprint

Minutes

- Andrew
  - Standup notes are valuable as a log of what was worked on and how effort was spent.
    - Even better with more people on the sprint
  - Need a metric for determining if we are on track or not
    - Maybe use story points to estimate issues as we did in Pivotal
  - Document a format for daily sprint updates
- Jon
  - Some tickets took longer than expected
  - Need to configure an IDE for debugging
  - Javadoc ticket took longer than expected
    - Useful for re-familiarizing with the codebase and processes
  - Would it help to evaluate participant's experience with various technologies and assign tickets based on this?
