

Admin UI - Reviewers can delete submissions in workflow

Title (Goal)	Reviewers can delete submissions in workflow
Primary Actor	Administrator
Scope	Workflow
Level	UI
Story (A paragraph or two describing what happens)	<p>A submitter may accidentally submit the same item twice, resulting in an obvious duplicate in the review workflow. Reviewers (perhaps restricted to a certain role) should be able to delete such an obvious duplicate directly. Currently, the only options are</p> <ul style="list-style-type: none">• make live the duplicate, then delete it; or• reject the duplicate and get the submitter to delete it from the workspace (or ignore it) <p>This is particularly noticeable when submissions are not made by people but rather eg an external system pushing through submissions via Sword.</p>
