

VIVO Vagrant

Description	A quick way to get a VIVO instance running on your machine.
Type	Quick start
Status	AVAILABLE
Owner	Ted Lawless
Language	Vagrant, Bash
Team	Multiple
Location	https://github.com/lawlesst/vivo-vagrant
License	

Description

[Vagrant](#) configuration and install scripts for running [VIVO](#) on a virtual machine, aka [Vagrant box](#), running an Ubuntu 64 Precise image.

The virtual machine will boot and install VIVO 1.8 and its dependencies. This will take several minutes for the initial install.

Why?

Setting up VIVO can be time consuming. This tool automates the process and creates a complete virtual machine to allow you to experiment with VIVO. It's cross platform - Windows, Mac, Linux - and built with open source tools.
