

# Apps and Tools Call 20151103

Date	2015-11-03
Topic	dchecker and nameparser

## Video

## Announcements:

- Chris invited regular working group participants to "join" by adding their name to the wiki. He would like to acknowledge all of the participation for various members of the community.

## Talks/demos:

Both of the projects below are available as Python modules and reusable by other VIVO instances.

[dchecker](#) - [Nicholas Rejack](#), University of Florida

Tool for finding data problems in VIVO via SPARQL and emails reports to administrators for data cleanup.

[nameparser](#) - [Justin Littman](#), GWU

Utility for parsing name strings into first, last, middle, etc.
