dchecker

Description	Data integrity checking software for VIVO.
Type	Data management
Status	AVAILABLE
Owner	Nicholas Rejack
Language	Python
Team	
Location	https://github.com/nrejack/dchecker
License	BSD 3-Clause

Goals

- Find and fix data inconsistencies in VIVO.

Description

Over time inconsistencies will emerge in VIVO data. Data stewards need tools for finding those and workflows for fixing.

Features

- SPARQL queries are run sequentially out of the *queries/* subdirectory. To add a new query, save it in a .rq file and it will be run automatically when the program is started.
