

2016-01-07 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Dial-in Number: (712) 775-7035
 - Participant Code: 479307#
 - International numbers: [Conference Call Information](#)
 - Web Access: <https://www.freeconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php>
- IRC:
 - [Join the #fcrepo chat room via Freenode Web IRC](#) (enter a unique nick)
 - Or point your IRC client to #fcrepo on irc.freenode.net

Attendees

- [Unknown User \(acoburn\)](#)
- [Bethany Seeger](#)
- [Nick Ruest](#)
- [Yinlin Chen](#) ★
- [Esmé Cowles](#)
- [James R. Griffin III](#)
- [Jared Whiklo](#)
- [Andy Wagner](#)
- [A. Soroka](#)
- [David Wilcox](#)
- [Michael Durbin](#)
- [Osman Din](#)

Agenda

1. Status of "in-flight" tickets

key	summary	type	created	updated	assignee	reporter	priority	status	resolution
	Unable to locate Jira server for this macro. It may be due to Application Link configuration.								
	2. Memento as versioning HTTP API.								Unable to locate Jira server for this macro. It may be due to Application Link configuration.
	3. Status of removing JCR from fcrepo								

Ticket Summaries

1. Please squash a bug!

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
		Unable to locate Jira server for this macro. It may be due to Application Link configuration.								

2. Tickets resolved this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Minutes

1. Discussed Unable to locate Jira server for this macro. It may be due to Application Link configuration., @A. Soroka the internal method check and remove 500.

2. Memento is a popular and widely-supported specification for versioning, many LDP platforms are choice Memento. Thus, we try to adapt Memento into Fedora's HTTP API for versioning. People in the meeting all agreed to proceed it. @A. Soroka will send out messages to the fedora communities.

3. Cleaning up the fcrepo-kernel-api, including moving JCR and modeshape (been done). After removing JCR, any implementation of the Fedora does not have to know about the JCR. There is on open request <https://github.com/fcrepo4/fcrepo4/pull/968>. This PR pushed JCR Session into the HTTP layers. You still need to address JCR Session in the HTTP layers. This is the intermediate implementation before completely removing JCR out of fcrepo-kernel-api.

Still need to discuss and clarify the definition and usages about the "transaction" in Fedora. e.g. @mike Would it make sense to call our new session construct a "transaction", since that's essentially what it is?
or if we use different backend which does not support transaction (e.g. hadoop)? An idea is to provide an optional for users to chose transaction or not., or an API-X module. Need to know how the communities think about it. (e.g. islandora community)
