

JHU API-X Use Case: re-write Content-Disposition HTTP headers for LDP-NR resources

Title (Goal)	When browsing the contents of the repository, I would prefer the browser display binary content in-line.
Primary Actor	Repository end user
Scope	
Level	
Author	Elliot Metsger
Story (A paragraph or two describing what happens)	<div>As a user browsing repository content, I find it inconvenient that binary content served by the repository is downloaded by my browser to a file on my computer. Instead, I would prefer to evaluate the content in my browser (to the extent possible), before making a decision to download the file.</div> <div>Link configuration.</div> <div>is derived from</div> <div>Unable to locate Jira server for this macro. It may be due to Application</div>
