

# manage the list of objects connected to her profiles

The researcher is able to make selected list for objects connected to her profiles like publications, projects, awards, etc.

The functionality is accessible from the gear in the researcher toolbar

DSpace-CRIS 5.4.0 Demo Site

Preferred, name

Profile

 **Credit Name** Preferred, name **Full Name** DSpace-CRIS, Researcher **Vernacular Name** Some Additional, names

[Edit Researcher Page](#)  
[Manage Publications](#)  
[Manage Projects](#)

This functionality is not limited to the creation of a selected list of publications. The system will automatically includes a "manage list" function for any  [inverse relation](#) defined in your data model, see Components in [Customize your DSpace-CRIS installation](#)

Publications on the Researcher's personal page can have one of three categories:

- Active publications, that are displayed normally,
- Hidden publications, that are not displayed in the ResearcherPage, but are still searchable in the Institutional Repository,
- Selected publications, that are moved in the "Selected Publications" box.

The "Selected Publications" box shows all the publications that have been selected, and allows to reorder them as wished using drag & drop.

For any particular publication, the user is able to:

- Change Category: For any publication entry, it is possible to change the category by clicking on the category icon A (active), H (hidden), S (selected), or U (disclaim)
- Filter: it is possible to use the filter to search through publications.
