Chapter Summaries

We would like to have a rolling google-document that will act as both a resource for keeping up with a summary of the book's content and relevant tools /resources as well as a record of our community's interpretation of the book. Each discussion session should establish one or more scribes to contribute notes to this document:

Mailing List

We have created a new google-group mailing list for on-going discussion related to the book to supplement the discussion group calls. Although the occasional update email will continue to be sent to the fedora-community mailing list, most of this book club's communications should take place on the duraspace-bookclub list:
