

Using the Gliffy Plugin

Thanks to the folks at [Gliffy](#), we now have an easy way to author and embed simple diagrams on Fedora Commons wiki pages.

Gliffy is a flash-based drawing tool built using the [OpenLaszlo](#) platform.

The plugin is really easy to use. Here's how it works:

1. Browse to an existing wiki page and select Add -> Diagram.
2. Use the Gliffy editor to create your diagram.
3. Select File -> Save and Close when finished.

Here's a simple diagram:
