

Writing Client Applications for Fedora

Writing Client Applications for Fedora

Until we update this page, one of the better references on this topic is Matt Zumwalt's post outlining [Inroads to Application Development for Fedora Commons](#) on the MediaShelf Blog.

Frameworks known to be used with Fedora

[Spring \(with Struts\)](#), [Drupal](#), [Ruby \(Rails/Merb\)](#), [Plone](#), [Pylons](#)

For a more complete listing of publicly available client applications used with Fedora, visit the [Fedora Tools page](#)
