

2016-07-03 VIVO Updates

Thomson Reuters is a VIVO Registered Service Provider! Need help with your VIVO implementation? Thomson Reuters is now a VIVO Registered Service Provider. Thomson Reuters can help you plan and implement VIVO at your institution. For more information about Thomson Reuters services, please contact [Ann Beynon](#) at Thomson Reuters.

Thomson Reuters joins Symplectic and Gunter Media Group as VIVO Registered Service Providers.

Join us for a VIVO Documentation work party in Denver, August 16. Attending the VIVO Conference in Denver, August 17-19? (you should, it's going to be great – chance to meet friends in the VIVO community, fantastic keynotes and speakers, presentations, posters and workshop, all things VIVO, register here: <http://vivoconference.org>) If you are headed to Denver, and like documentation, come a day early and join the work party! We'll be working all day on the VIVO technical documentation – updating material, identifying gaps, writing new pages, and organizing materials in the new technical documentation wiki – see [VIVO 1.9.x Documentation](#). We'll quit around 5:30 to enjoy the best of what Denver has to offer. Like documentation? Need documentation? Please join us! Contact [Graham Triggs](#) or [Mike Conlon](#) for details. Location is TBA, we will fill in details as we go.

PIDapalooza, Reykjavik, Iceland, November 9-10. Persistent identifiers are getting a festival/meeting of their own. I'm planning to be in Iceland November 9-10 for the inaugural PIDapalooza, some kind of something for persistent identifiers, co-sponsored by CrossRef, DataCite, ORCID and the California Digital Libraries. See <http://pidapalooza.org> and follow the festival on Twitter [@pidapalooza](#).

SHARE Hackathon and Community Meeting, Charlottesville, VA, July 11-14. Going to the [SHARE Hackathon and Community Meeting](#) in Charlottesville, VA? The week begins with a Hackathon around the SHARE metadata collection, and SHARE Notify. A SHARE/VIVO session is being organized by [Andi Ogier](#). The SHARE VIVO Harvester (VIVO to SHARE) and SHARE2VIVO will be discussed along with ideas for future SHARE and VIVO projects, including efforts to provide Fedora/VIVO/SHARE connectivity. I hope to see you there.

Outreach and Engagement, this Thursday 1 PM. Thursday this week at 1 PM eastern US time we will have a call of the [Outreach and Engagement Interest Group](#). New to VIVO? This group is a great place to start – meet people, introduce yourself, ask questions, get help. The calls are not technical and everyone is welcome!

Go VIVO!

Mike
