

2016-04-21 Trip Report -- Allen Press

Sea Change: Challenges and Opportunities in the Publishing Ecosystem

April 21, 2016

Opening Session

Alice Meadows, ORCID, Role of ORCID in the scholarly ecosystem

Kristin Ratan, Collaboration Knowledge Foundation

Mike Conlon, Science, collaboration, and data

Breakout 1 – small publishers and metadata

What is important for publishers

Metadata. From authors. Through scholar. One and others

How. Important is organizational substructure to publishers? What would substructure be used for?

Breakout 2 – What comes next – org identifiers, attribution

What comes next? org identifiers, attribution

Roger Schonfeld Ithaka S+R

Transformation from print to. Electronic

Transformation of workflows -- bundling, cataloging, indexing

Transformation of role -- from providing content to facilitating outcomes

Travis Rich @istravis

Grad student at MIT

Journals from scratch

Pubpub.org

Open source, open workflow for open publication. Google docile (markdown) enhanced.

Thinking differently about scholarship. Write, publish, review, collaborate, revise, ...

Grassroots journals -- free to launch, free to curate, focus on work of importance

Journal of design science

Launched Feb 24

Will be able to create doi.

Sara Bowman @osframework

Realigning incentives: registered reports

Move peer review after the design phase

The journal "Cortex" is publishing "registered reports". Now 20 journals.

Phill Jones, Digital Science @phillbjones

Overview of ecosystem.

Digital lab notebook. Compliance. Identifiers.

Judy Ruttenger, ARL, SHARE program director

Gary Dunham, Indiana university press
