2016-08-04 Fedora API Extensions Meeting

Date: Thursday, August 04, 1pm EDT (-4 UTC)

- Dial-in Number: (712) 775-7035
 - o Participant Code: 479307#
 - o International numbers: Conference Call Information
 - You may also call in using the <u>VoIP dialer</u> from a web browser, or Android/iOS apps
- IRC:
- O Join the #fcrepo chat room via Freenode Web IRC (enter a unique nick)
- Or point your IRC client to #fcrepo on irc.freenode.net

Attendees

- Aaron Birkland will NOT be at meeting
- Nick Ruest
- Jared Whiklo
- **Daniel Davis**
- Elliot Metsger
- Unknown User (acoburn)
- Ruth Duerr
- Joshua Westgard
- Bethany Seeger
- Katherine Lynch
- Andrew Woods
- Stefano Cossu
- Diego Pino Navarro
- Hanh Vu
- David Wilcox
- Yinlin Chen

Agenda

- 1. Do we consider URIs in API-X to be done?
- 2. Service Discovery and Binding have and Execution are out for review. Are there any outstanding issues that need to be addressed before finalizing them?
- 3. Next step with design docs commit to GitHub repo.
 - a. Can design-related issues in GitHub (#2, #3, #4, #5, #6, #7, #30) be closed once this happens?
- 4. Discuss moving the non-developer overview doc to an official, more finalized state.
- 5. Work in progress for #10 and #12 Aaron Birkland will bring local work into alignment with docs, have PR by next meeting

Minutes

URIs in API-X

Clarify Rob's objections:

- In his repo, he has object with existing URIs, is concerned that putting a proxy in front of those objects would necessitate new uri assignments you can configure API-X proxy to not change uris at all, but use existing ones.
- What happens if you install/expose services in API-X that has the same names with objects in the repository
 - o In practice, that's not likely to happen. Maybe there's a way for API-X to prevent this from happening

This doc can be considered finalized and ready to be committed to github

Service Binding doc, Execution and Routing doc review

Review these docs between now and next API-X call

GitHub issues relating to design doc can be closed after design docs are committed to GitHub?

- . These issues should be closed once design docs are complete. New questions related to these issues in the future should be submitted as new
- Summary of discussion could be captured at the closing note of the GitHub issue

Non-Technical Overview doc

- This doc should be put in the confluence wiki page for API-X
- Give the group until next call to call the document finalized
