Minutes

1. 4.7.0 Release status – we need a PostgreSQL and Mysql test. [Yinlin Chen](#) has a question about Solr indexing, but it may be an artifact of how the tests are run. The Solr indexing issue does not appear to be a blocker but rather indicates a need for improvement of the testing mechanism. [Jared Whiklo](#) will look into this.
2. Discussed [jcr.Session](#) being replaced with a [FederatedWrite](#). Every session is considerably easier to write. Every session is considerably easier to write.
3. Discussed [Hash URIs](#) on binaries. This issue is not a blocker.
4. Discussed [Linked Data Notifications](#) (this will enter WSC recommendation review next week) and some [proposed machinery](#) for [fcrepo-camel](#) that would make it easier to build an asynchronous LDN toolchain for internal Fedora events. This feature intersects significantly with the current audit functionality but with (potentially) considerably more flexibility.
