Test - Platform Profile: melendor.local

A profile for the platform on which a given performance test is to be run must define the hardware and any relevant software details.

Here is a template to help ensure that a profile contains enough information:

Parameter	Possible values	Notes
Clustered?	No	
Processing hardware	Intel Core i5 1.3GHz, 2-core	
Operating system	MacOSX 10.9	
Memory	2048 MB	
Allocated storage	800 GB	
Persistence I/O	40.25 MB/s	
Network I/O	localhost
