Overview

VIVO has several pages that can be reached by adding one of the words below to the end of your VIVO URL. For example, if the URL of your VIVO home page is `http://vivo.myschool.edu`, then you can access a page regarding revision information by accessing `http://vivo.myschool.edu/revisionInfo`.

sitemap.xml

See the XML VIVO generates for your site's sitemap.

SearchIndex

Show search index status and access to rebuild the VIVO search index

RecomputeInferences

Review all triples in the triple store and add inferences to the inference graph as needed.

revisionInfo

Show a page of version information including date and time of most recent build, as shown below.

Revision Information

Levels:

name	release	revision
VIVO	1.9.1	066d5a0

Build date:

Thursday, October 6, 2016 5:00:03 PM EDT

freemarkersamples

Displays a page of Freemaker widget results. The template for this page can be found here `vitro-core/webapp/web/templates/freemarker/body/samples.ftl`.

vivosolr

Display the VIVO Solr search index control panel
