## Vitro Editor

- Idea here was to use Vitro, not only to record instance level data but also as an Ontology Editor. Being inspired by [Protege](#), we have created new Class/Object Property and Data Property pages to browse, create, update, delete entities. The code is available on the github.

- Any questions in regards to the code can be send to
  - [am2269@cornell.edu](mailto:am2269@cornell.edu) (Amit Mizrahi, undergraduate student who worked on it)
