2017-02-22, DSpace 7 Outreach Agenda

Date

01 Feb 2017

Attendees

- Carol Minton Morris (chair, DuraSpace)
- Wouter Janssens (Atmire)
  - ~~Bram Luyten (Atmire) (may occasionally sit in)~~
- ~~Sarah Molloy (Queen Mary University of London) (apologies)~~
- Mariya Maistrovskaya (University of Toronto)
- ~~Felicity Dykas (University of Missouri)~~
- ~~Jose Carvalho (University of Minho)~~
- Nelson Torres (University of Minho)
- ~~Tom Hutchinson <thutchi1@swarthmore.edu>~~

Apologies

- Pauline Ward (University of Edinburgh)

Goals

- Convening efforts to reach out and deeply engage the DSpace community in the aspects of DSpace 7 development.
- **Next meeting Mar 1: 12:00 PM ET; UTC 17:00, on https://www.uberconference.com/duraspace**

Discussion items

Item	Who
Catch-up, Announcements	All
Request from tech team: SWAG suggestions for upcoming meetings and demos–pens, stickers, other?	Carol
Resume review use cases related to browse and search Currently, the following use cases describe the search and browse functionalities of DSpace. - End User - Browse - DSpace - DuraSpace Wiki completed - End User - Search for items - DSpace - DuraSpace Wiki completed - Admin UI - DSpace should accommodate basic index normalisation - DSpace - DuraSpace Wiki - Admin UI - Customise which metadata fields to facet upon, search upon - DSpace - DuraSpace Wiki - Admin UI - Configure and manage custom facets - DSpace - DuraSpace Wiki - Admin UI - Rebuild the discovery index - DSpace - DuraSpace Wiki - Admin UI - Move a collection and trigger a re-index - DSpace - DuraSpace Wiki - Admin UI - Trigger the re-index of a collection - DSpace - DuraSpace Wiki - Admin UI - Manage Indexes/Indexing - DSpace - DuraSpace Wiki - Stats/Metrics - Distinguish full-text searches from faceted navigation - DSpace - DuraSpace Wiki - Stats/Metrics - Configure the number of top searches to display - DSpace - DuraSpace Wiki - Stats/Metrics - Clarify "Page Views per Search" - DSpace - DuraSpace Wiki - End User - Enhanced access to related items - DSpace - DuraSpace Wiki	Wouter Janssens (Atmire)
Latest news ideas	Carol Minton Morris
Other	

Notes

Catch-up, Announcements

Wouter will share slides from recent presentation

Request from tech team: SWAG suggestions for upcoming meetings and demos–pens, stickers, other?

- Looking at small, inexpensive, easy to mail items; must be simple to produce; no capacity for complex items
- An investment in marketing; which objects will generate greatest visibility
- City maps of city that meeting/conference is in; great idea, no capacity for that degree of one-off production
- Like backlight stickers (something over the apple light on computers—not all people have the same computer
- Regular stickers are often put on backs of computers–good visibility
- Content: logo is dated; alternative?
- Wouter will look into what open source projects are doing by next meeting
- Image over the back of cell phone; maybe too personal?

Resume review use cases related to browse and search

- One more comment on End User - Search for items - DSpace - DuraSpace Wiki
- Specifications are correct and everyone agrees with the use case; valid and desirable function; "jump to lists" are not as intuitive as they might be; change "jump by" that filters list as user would expect
- Admin UI - Configure and manage custom facets - DSpace - DuraSpace Wiki, not included in DSpace 6; not a good idea to include in DSpace 7; more of admin functionality
- Admin UI - Rebuild the discovery index - DSpace - DuraSpace Wiki not included in DSpace 6; not a good idea to include in DSpace 7; more of admin functionality "nice to have"
- Admin UI - Move a collection and trigger a re-index - DSpace - DuraSpace Wiki May/may not be included; solr index changes accordingly; functionally one requires the other (previous 2 UCs)
- Admin UI - Trigger the re-index of a collection - DSpace - DuraSpace Wiki Duplicate of above; more specific version of above; not included in DSpace 6; desired at the moment; not sure about priority; move collections and trigger re-index would be preferable; triggering a re-index should only be possible for the repo admin; auto re-index controlled by admin
- Admin UI - Manage Indexes/Indexing - DSpace - DuraSpace Wiki summary of previously discussed use cases, not included in DSpace 6, "nice to have"
- Stats/Metrics - Distinguish full-text searches from faceted navigation - DSpace - DuraSpace Wiki search stats from repo as a whole, a community or collection; http://demo.dspace.org/xmlui/handle/10673/31/statistics user stats; http://demo.dspace.org/xmlui/handle/10673/30/search-statistics admin stats; current functionality is only for JSPUI; XMLUI is more sophisticated–would be good to have this; to analyze behavior of users
- Stats/Metrics - Clarify "Page Views per Search" - DSpace - DuraSpace Wiki
- End User - Enhanced access to related items - DSpace - DuraSpace Wiki

General comments

- Is there other functionality that is higher on the list?
- Stats need to be more robust; having only a number of views per page is not meaningful
- Virtual stats include by default?
- Not currently in development
- Some of these use cases seem out of context
- Note: next meeting be aware that we are moving on to review authorization and authentication use cases
- Divide the work and compile new use cases; re-work the use cases that need to be re-worked
- Mariya to compile a list of use cases related authorization and authentication–logging on, collection authorization and groups
- Would be good to provide feedback to the community on how these use cases are morphing into functionality
- Visuals on transformations would be good
- Mariya had a questions from a repo manager—concerned about preservation of core functionality; will we be losing something that we are used to without getting something back?

Action Items

- Carol Minton Morris draft community message regarding attendance at targeted meetings/conferences
- Wouter Janssens (@mire) to meet with tech team rep to align with Outreach work
- Wouter Janssens (Atmire) to re-write relevant search and browse use cases for review
- Mariya Maistrovskaya to compile a list of use cases related authorization and authentication for review by Outreach
- Mariya Maistrovskaya to begin draft of update community expectation management article focused on search and browse functionalities (2-3 weeks)
