Attendees

- Graham Triggs, Duraspace
- Mike Conlon, Duraspace, University of Florida
- Debbie Lawlor (McMaster)
- Marijane White
- Laura Doyle (US EPA)
- Benjamin Gross
- Ralph O'Flinn
- Javed (Cornell)
- Huda Khan (Cornell)

Announcements

Discussion items

Time	Item	Who	Notes
5m	Intro	Graham Triggs	Introduction and general announcements
5m	v1.9.2 release	Graham Triggs	
5m	v1.10.0 testing	Graham Triggs	Should we cut an early alpha for Jena 3 testing?
45m	Ontologies	Mike Conlon	Discussion of where we are, and what we might need

1.10 testing

With the upgrade to Jena 3, some significant testing is needed for the upgrade, which means ensuring that we have a number of people doing so independently. How can we ensure this happens?

Ontologies

Slides - https://goo.gl/75VUgs

Florida - 8,000 journals, 13,000 organisations, all curated by university

Notes

1.10 - Will organise an Alpha release - bullet point things to test, and how to contribute tests

Ontologies

Javed - similar presentation for LD4L team.

Proposing that we should do impact analysis of ontology change

There are changes that are low to no-impact.

Marijane - recently exposed to couple of ideas for making changes

1. Going through OBO tutorial
2. Rich Hickey presentation

Both talk about not deleting things

Javed - issue of integrating data from different sources using different ontologies (versions)

Mike - there are scenarios in which duplication are feasible.

- I have had customers that say "don't change it again"
- Like to get into business of low-to-no impact changes
- Work towards slightly more substantial changes - need to be aware of impact, and discuss with the community

MW - concerned about current state of ISF. All the purls are broken in OpenRIF repository.
