

# 2017-04-27 - Fedora Tech Meeting

## Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Dial-in Number: (712) 775-7035
  - Participant Code: 479307#
  - International numbers: [Conference Call Information](#)
  - Web Access: <https://www.freeconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php>
- IRC:
  - [Join the #fcrepo chat room via Freenode Web IRC](#) (enter a unique nick)
  - Or point your IRC client to #fcrepo on [irc.freenode.net](http://irc.freenode.net)

## Attendees

- [Jared Whiklo](#)
- [Andrew Woods](#)
- [Daniel Lamb](#) ★
- [Danny Bernstein](#)
- [Jim Coble](#)
- [Simeon Warner](#) (phone only)
- [Kevin Ford](#)
- [Michael Durbin](#)
- [Joshua Westgard](#)

## Agenda

1. [Kevin Ford's issue from list](#)

2. Implications of blank node redesign:

a. Based on community

b. Need upgrade utility:

3. Potential 4.7.3 release

## Minutes

### Kevin Ford's Issue on the List

Traversing the repository looking for corrupted resources won't work because the ldp:contains predicate is not set for the corrupted resource.

500's were received during the long-running ingest which led to this discovery.

Possibly a concurrency issue, which could be eliminated as a cause if there was more information available.

Unfortunately no TRACE level logging available, nor stack traces from the logs for a root cause.

Would be good to see if it's possible to do an import/export at the ModeShape layer to see if ModeShape can read the corrupt resources.

Mike Durbin thinks it is possible to provide a patched Fedora to ameliorate the issue if we can isolate where the issue is occurring.

### Possible release for skolemizing blank nodes

All resolved issues resolved in the master branch are non-breaking and could be rolled into a minor release.

Although not strictly required, those with existing blank nodes that plan on ingesting new ones, you'd have both hash uris and .well-knowns.

Tentative +1 to get those changes out and go through the process of community testing.

The new Jena library changes some xsd info that could cause some existing clients to break without a small configuration change.

[Simeon Warner](#) suggested using configuration to enable new blank node behavior, but to leave it disabled by default. Then it's DEFINITELY non-breaking, as opposed to possibly non-breaking.
