

What's new and different in DSpace7

DSpace 7 improves upon the previous version in a number of ways:

- A better overall architecture with a clear separation between business logic & presentation thanks to the development of a new full fledged [HATEOAS REST API](#)
- A sleeker more modern user interface.
- The [Angular codebase](#) for the user interface facilitates customization and further development.
- Improved statistics.
- The Collection structure has been simplified ...?

Other DSpace 7 important resources:

- A recent summary of the project status from [Tim Donohue](#): <http://duraspace.org/articles/3157>
