3. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Minutes

1. No good resolution to Kevin's issues yet.
 - a. Andrew put together an export metadata from modeshape tool. Kevin has not yet had time to run awoods' tool.
 - b. Kevin will run as soon as he can.
2. Fedora API Specification:
 - a. New editorial team met yesterday
 - i. discussion focused on external content
 - ii. Esme put forward a proposal in response:
<https://github.com/fcrepo/fcrepo-specification/wiki/External-Content>
 1. Fedora should proxy the content
 2. Client should not have to worry about the details of how the content is managed.
 3. If you have questions or comments, you can add comments notes to the document above
 4. Open weekly API Spec calls Wednesday 2:30-3:30 Eastern
 5. Fedora 4 only supports redirect, not proxy
 - a. One redirect use case: sometimes you want to download the content from a difference source (for performance reasons) but manage all metadata in fedora
 - b. Proxy makes fedora responsible for access control
3. 4.7.3 Release:
 - a. wait for Andrew for timing and migration util
 - b. are moving forward with configuration. to support import export
