2017-05-11 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Dial-in Number: (712) 775-7035
  - Participant Code: 479307#
  - International numbers: Conference Call Information
  - Web Access: https://www.freeconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php
- IRC:
  - Join the #fcrepo chat room via Freenode Web IRC (enter a unique nick)
  - Or point your IRC client to #fcrepo on irc.freenode.net

Attendees

- Esmé Cowles
- Doron Shalvi
- Joshua Westgard ⭐
- Michael Durbin
- Bethany Seeger
- Michael Klein
- Jared Whiklo
- Daniel Lamb
- Kevin Ford
- Kieran Etienne

Agenda

1. Any news from Kevin Ford's issue from list
2. Updates from Michael Durbin's optionally-updating-server-managed-triples work
   a. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
3. Fedora A
   a. 05/10/17 Meeting
   b. Outstanding issues: https://gi
4. Need upgrade utility for 4.7.3 release: Unable to locate Jira server for this macro. It may be due to Application Link configuration.
   a. This utility is up-for-grabs, if someone is interested in moving it forward
5. ...
6. Status of "in-flight" tickets

Ticket Summaries

1. Please squash a bug!

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
Unable to locate Jira server for this macro. It may be due to Application Link configuration.										

2. Tickets resolved this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Minutes

1. Update on issue of non-existent child resources (Kevin Ford):
    a. Fixing this problem in the affected repository will require the following "open-heart surgery" process:
        i. making a Modeshape backup;
        ii. determine which resource have non-existent children and delete them;
        iii. restore the backup.
    b. But fixing it won't resolve the underlying issue in Fedora/Modeshape.
    c. Another goal of the investigation will be to determine when these objects first appeared.
    d. Michael Durbin: we need to have
2. anaged triples change (Unable to locate Jira server for this macro. It may be due to Application Link configuration. , Michael Durbin):
    working on some edge cases for updating the modification dates of linked resources when restoring from a backup.
    b. Plan is that when a child object is restored via import, the modification timestamp of the affected parent would only change if the last modified date is later than the creation date of the restored child object (thus mimicking how things would appear if the restored object had never needed to be restored).
    c. Changes are needed for this to be useful for import/export, but there are some thorny aspects to this and the goal is to create an intuitive way of dealing with those.
3. API Specification Working Group (Esmé Cowles):
    a. Latest developments can be found in the minutes.
    b. Next meeting
4. Question of the ticket (Unable to locate Jira server for this macro. It may be due to Application Link configuration.) for an upgrade utility to accor
    a. This utility would allow repositories that have already made use of blank nodes to update existing blank nodes (that follow the old "well-known" behavior) work the same way as newer blank nodes (using hash URIs).
    b. Danny Bernstein is working on a feature that would allow well-known to continue to be used for those who desire continuing to use the old behavior.
    c. So far nobody has taken up this ticket, probably because nobody who is in a position to work the ticket needs it (none of those present at the meeting currently makes use of blank nodes). It is thus unclear whether there is really a need for this upgrade utility.
5. In-Flight tickets:
    a. One ticket (Unable to locate Jira server for this macro. It may be due to Application Link configuration.) was resolved by Bethany Se
    b. Work on a number of other in-flight tickets will resume with the import/export sprint.
