Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Tickets created this week:

> Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Minutes

API Spec

- Pushing through lots of issues in prep for working draft next week
- A few open issues remaining
- Making a milestone in GitHub
- Target date of June 20
- 4 month window for input after publication of working draft
- Planning a sprint to align the current implementation with the spec

4.7.4 Release

- Will be released immediately following OR2017
- Andrew looking for someone to pull non-breaking commits into the maintenance branch
  - Danny B volunteered for this
- Need a release manager as well
  - Jared volunteered to be release manager

Release of fcrepo-java-client

- Need to release new import/export tool
- Andrew created a 0.1.1 release for OR2017 workshop
- Still need to do a fuller 0.2.0 release
- We are relying on unreleased functionality from the Java client
- Lots of good work has gone into the client since the last release
- Looking for volunteers to run through the release process
  - Danny B volunteered
- Should the release be 0.3.0 or 0.2.2?
  - General agreement that this should be a 0.3.0 release with an eye toward a 1.0 release soon

Fedora Committer on Leadership Group

- Facilitate communication between project governance and technical team

Import/export sprint

- Sprint 4 recently concluded
- A couple outstanding tasks before release
  - Verification tool
    - A couple pull requests need to get pushed through
    - Otherwise ready for testing
  - Import/export utility
    - Need to release Fedora 4.7.4 before 0.2.0 import/export utility
    - A few remaining issues left to resolve, particularly around lossless roundtripping

Update on Low Hanging, Priority Bugs

- Parallel builds
  - Fixed by Danny B
- Text/CSV interpreted as RDF
  - Bethany working on this one

Actions
