

# Pilot 2017-18 joint focus areas & deliverables

**Scope:** Documents joint focus areas and deliverables for the pilot

**Creator:** Michelle Durocher

In initiating an ISNI Registration Agency Membership agreement, the Program for Cooperative Cataloging is undertaking a year-long ISNI pilot to develop an understanding of ISNI tools and systems, to create PCC documentation and training for its members, and to put in place member supports for cost-effective scaling of broader PCC involvement in ISNI.

Participating institutions will work together on several focus areas that will be necessary to meet Pilot deliverables:

- [API review/testing](#)
- [Batch processing template/workflow](#)
- [Documentation & training](#)
- [ISNI \\$1 Pilot in OCLC WorldCat bibliographic records](#)
- [ISNI maintenance best practices](#)
- [Workflow & tools best practices](#)

The Pilot will be successful if participants develop the necessary information and best practices that allow future PCC members to learn ISNI tools and participate in ISNI beyond the pilot.
