

The CORE recommender plugin

Since [DSpace-CRIS 5.8.0](#)

The CORE recommender is a free service provided by the [CORE project](#) that allow to embed a list of recommended Open Access resources in the Item page related to the content of the item.

Read more about the [CORE recommender technology](#)

The plugin can be enabled in the [core-aggregator module configuration file](#), via injection of the properties from the [build.properties](#) o the [local.cfg](#) (since DSpace-CRIS 6)

To get an api-key for the CORE recommender you need to register your repository here: <https://core.ac.uk/recommender/register>
