Fedora and Samvera Dinner Notes	Stefano
Graph — Notes	
CNI Fedora Leaders Meeting Agenda	David
DuraSpace Cross-organizational Changes	Andrew/David
OR2018 Conference Proposals	David
Roundtable	All

Previous Actions

Minutes

- 1. Fedora and Samvera Dinner Notes
 - a. Dinner during Samvera Connect several conversations captured in notes
 - b. See: Fedora and Samvera Dinner Notes Graph Notes

- c. Connection issues will table discussion for later
- d. Venn diagram display of objects is key thing we need for users and is missing
- e. Stefano would like to make an editable version of the Venn Diagram
- f. Features ideas discussed interface to show where object is (example), (Rosie, Declan, Eviva) will look into preparing document with some ideas to share with the group
- g. Concern about Fedora not getting in the way (and it will be good to elaborate on this)
- h. Fragmentation of the Fedora communities something to tackle (between Samvera, Islandora, other clients)
- i. What was the tenor of the discussion? A desire for working together, not fragmentation how to continue working together would be beneficial to have conversation at Open Repositories about this
- j. Topics in notes some aspirational, some are current, in Fedora/Samvera
- k. Leadership discussion topic noting various lines of potential fragmentation, directions of various related communities and position (if anything) of messaging to the community
- I. Driving principles/ideas zoomed out from Venn diagram. One: what is something to work around, and what is essential in a robust digital repository. Something we need to discuss at CNI not clarity on all the services Fedora provides clarification will help in larger library community.
- m. Can we zoom out and include other clients/communities in the Venn diagram? Can we improve our net investment to get a better view of the broad needs of the various stakeholders for Fedora. Many Islandora members still using Fedora 3 having a tool in front of them is most critical (putting resources to CLAW, for example). Islandora folks aren't really using Fedora 4 so aren't speaking to what ideas /concerns are, whereas Samvera community actively using Fedora 4 has much more to say.
- n. **Takeaway**: have this as an agenda item on the Fedora Leaders meeting at CNI in December. Share completed documentation before the December meeting.
- o. Action item for Stefano: transfer Venn diagram to Google Drawing.
- 2. CNI Fedora Leaders Meeting Agenda
 - a. Agenda any additions/changes?
 - b. State of the technology can this go beyond a state, to what are the important questions we need to answer using time to work together rather than just reporting.
 - c. Possibility of adjusting order of Agenda where to place Mission/Vision conversation for most impact, especially for new people
 - d. Onboarding process/how new leaders can get up to speed to be prepared for participation would be interested in feedback from new leaders
 - e. How to ensure we have enough time to talk about Mission/Vision we need to avoid letting other agenda items prevent finishing this conversation. Better to front-load the vision conversation first as it will impact further agenda items (Budget, Membership, etc.)
 - f. Action item: fleshing out Agenda Item 1 Mission/Vision/Staffing in advance of meeting Mission/Vision group do before CNI (group meets twice before CNI)
 - g. Action item: Agenda Items 2-6 report out in advance of meeting, come prepared with feedback, to allow for more focus on Agenda Item 1
 - i. Include concrete questions for the group (in addition to updates)
 - h. Phone call pre-meeting for new members to help get up to speed (Thanks Karen)
- 3. DuraSpace Cross-rganizational Changes
 - a. Projects across DuraSpace can be more disjointed than would be preferable
 - i. Technical folks thinking of this as a team
 - ii. Community/project management another team
 - iii. These two teams working together more and considering DuraSpace projects more broadly
 - b. Committers "Holiday Gathering" how to coaelesce around priorities in 2018 (today)
 - i. Define and increase community engagement
 - ii. Have rotating roles such as annual Fedora Tech lead coming from committers group
 - iii. Have conversation about how to implement such a shift
 - iv. How would technical team at DuraSpace support a Technical lead from committers group identifying expectations
 - v. Will document internally and communicate to board (Debra will work on this)
 - vi. Practical benefit for widening circle of technical participation, and a good idea to have a technical lead amongst committers.
- 4. Open Repositories
 - a. Think about ideas and how to focus Fedora-related presentations and will discuss further at a future meeting.

Actions

- Stefano Cossu: transfer Venn diagram to Google Drawing.
- Vision & Strategy group: Fleshing out Agenda Item 1 Mission/Vision/Staffing in advance of meeting Mission/Vision group do before CNI (group meets twice before CNI)
- All: Agenda Items 2-6 report out in advance of meeting, come prepared with feedback, to allow for more focus on Agenda Item 1
