

# 2018-02-07 - API Spec Meeting

## Time/Place

- Time: 2:30pm Eastern Time US
- Dial-in Number: (712) 775-7035
  - Participant Code: 479307#
  - International numbers: [Conference Call Information](#)
  - Web Access: <https://www.freconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php>

## Attendees

[blocked URL](#) (facilitator)  
[blocked URL](#) (notetaker)

- Benjamin Armintor
- Esmé Cowles 
- Daniel Lamb
- Andrew Woods
- Simeon Warner 

## Agenda

1. Editors / Implementers meeting:
  - a. Thursday, Feb 22nd @1pm ET
2. [Compatibility test suite](#) usage updates?
3. Pull requests:
  - a. [pr-329](#) - Editorial change: Reordering of Authorization subsections (*needs review from all*)
  - b. [pr-326](#) - Loosening requirements on rel-type link headers for PUT when type is (*awaiting response from Daniel Lamb*)
    - i. There is friendly debate on whether this section should be included at all
    - ii. The general issue is: do we want to specify the ability to change LDP Types (i.e. interaction models)?
      - And if, yes: do we want to specify the mechanism by which that is done?
    - iii. It would be great to get [Simeon Warner's](#) and [Esmé Cowles'](#) voices in the conversation
  - c. [pr-325](#) - Making location headers a MUST in post responses for Idpcv's (*needs discussion*)
4. Plan for addressing open [Recommendation](#) issues
  - a. [All assigned](#)
  - b. [#310](#) - Accept-Post reference incorrect
  - c. [#308](#) - Requiring Accept-Post on OPTIONS, recommending for GET/HEAD - **resolved-needs-PR**
  - d. [#280](#) - Versioning scheme of spec - **resolved-needs-PR**
5. Open [No Milestone](#) issues
  - a. [#315](#) - Does versioning containers violate the single-containment principle?
  - b. [#316](#) - Recursive delete and constraints/messaging - 3 weeks since last comment

## Notes

1. Editors / Implementers meeting: Thursday, Feb 22nd @1pm ET
  - a. [Esmé Cowles](#) will not be able to make it, [Simeon Warner](#) will be UK and will try to make it but no guarantees, others should be able to
  - b. What do we want to get out of this meeting?
    - i. Better community understanding of issues by answering questions, from which we might get clues about things in the spec that aren't clear
    - ii. Keep focus within the scope of the effort, start with framing of scope/charter/goals and desire to help implementers understand spec (not a forum to reopen issues, that should happen on github)
    - iii. Want to make timelines clear, hope to land spec in April and would like to help implementers make the same timeline
2. [Compatibility test suite](#) usage updates?
  - a. Simeon had some discussion with Jorge about running against trilpy, many failures however
  - b. Esme did try it a couple of weeks ago
  - c. We should all try to interact on the public fedora-api-test-suite channel
3. Pull requests:
  - a. [pr-329](#) - Editorial change: Reordering of Authorization subsections (*needs review from all*)
    - i. No changes, just reordering
    - ii. Needs review from [Daniel Lamb](#) and [Benjamin Armintor](#)
  - b. [pr-325](#) - Making location headers a MUST in post responses for Idpcv's (*needs discussion*)
    - i. Agreement to keep just first sentence about POST being optional in this situation
    - ii. Done...
  - c. [pr-326](#) - Loosening requirements on rel-type link headers for PUT when type is (*awaiting response from Daniel Lamb*)
    - i. Agreement that support for changing types is MAY (and not MUST), and that SHOULD for the sub-class issue

- ii. Agreement on "Implementations MAY allow the interaction model to be changed by specification of a new LDP type in a Link header. If supported, requests SHOULD be rejected unless the new LDP type specified is a sub-type the current type."
4. Plan for addressing open **Recommendation** issues
    - a. [All assigned](#)
    - b. [#310](#) - Accept-Post reference incorrect
      - i. [Simeon Warner](#) will take a stab at this
    - c. [#308](#) - Requiring Accept-Post on OPTIONS, recommending for GET/HEAD - **resolved-needs-PR**
    - d. [#280](#) - Versioning scheme of spec - **resolved-needs-PR**
      - i. Agreement that we put version number in the title, will keep dating for URIs. [Andrew Woods](#) will create a release checklist issue and add this item, then we can close #280
  5. Open [No Milestone issues](#) – did not get to this
  6. [Daniel Lamb](#) to create agenda for next week

## Action Items

- ACTION ([Daniel Lamb](#)): To create PR: non-norm: LDPCv is both a timemap and a container, but does not allow POST
