 - b.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

[Mike Conlon](#)
5. Are there [salted hashes](#) in Vitro/VIVO for passwords? If yes, documentation should be updated accordingly,

Notes

[Draft notes in Google-Doc](#)

1. [Sprint topics](#)
 - a. Sprint dates - weeks of May 21 and 28?
 - i. *Project strategy meeting taking place on 01/03/2018 (March 1st)*
 - ii. *The strategy meeting will define some priorities and might therefore influence the sprints following.*
 - iii. *Having some outputs from sprints at this stage on the project seems to be the top priority.*
 - iv. *Andrew is going to call for interest on end of April (2 weeks) Sprint leadership.*
 - *Making a successful sprint is more or less :*
 - *Institutional support is necessary*
 - *1 call at the beginning*
 - *1 retrospective call*
 - *And virtual stand ups through Slack*
 - *Leading a sprint does not necessarily require deep knowledge of VIVO code. Review, coordinating etc. is the main task.*
 - *Javed is taking the lead for April Sprint. Ralph can assist.*
2. Maven discussion from last week
 - a. *Lot of people might be having issues on using Maven. There should be a documentation on how to proceed on builds with their customizations.*
 - b. *On VIVO Maven is used to build but also to deploy the application. There is a ticket on how we use Maven on the project cause for the moment the process is very developer oriented.*
 - c. *There is a use case on a non developer person being able to evaluate the application without having to do developer's modifications. Having a War file to drop in a application container and a setup a database*
 - d. *The idea of having a vagrant or virtual machine with VIVO installed is proposed for that use case*
 - e. *A pre-packaged VIVO is an executable jar file with Jetty inside is also a possibility. It would just require the user to have Java installed. An evaluation system using TDB for installation on a Mac has been developed for VIVO Camp. Download, unzip, startup: https://drive.google.com/open?id=19jqP9jyiQpzxTeR_n401WIHsbWvRTXR7*
3. Join the development team!
 - a. *There is a need to clarify on what are the expectations from VIVO committer team members*
 - b. *Process, We need more people taking this contribution process.*
 - i. *review other's PRs and approve/request-changes*
 - *There a need of people engaging in this task.*
 - c. *A committers list with their [respective expertise](#) needs to be created.*
