

2018-03-08 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Dial-in Number: (712) 775-7035
 - Participant Code: 479307#
 - International numbers: [Conference Call Information](#)
 - Web Access: <https://www.freeconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php>
- IRC:
 - [Join the #fcrepo chat room via Freenode Web IRC](#) (enter a unique nick)
 - Or point your IRC client to #fcrepo on irc.freenode.net
 - ? add slack channel info here?

Attendees

- [Danny Bernstein](#)
- [Bethany Seeger](#)
- [Jared Whiklo](#)
- [Peter Eichman](#)
- [Andrew Woods](#) ★
- ~~Yinlin~~
- [Esmé Cowles](#)
- ~~Doron Shalvi~~
- ~~Kevin Ford~~
- [Randall Floyd](#)
- [Carrick Rogers](#)
- [David Wilcox](#)
- [Ben Pennell](#)
- [Aaron Birkland](#)
- [Daniel Lamb](#)

Agenda

1. Alignment Sprint 1 Progress Report
 - a. [2018 Spring API Alignment Sprint 1 Planning](#)
 - b. [Compatibility Test Suite](#)
 - c. Memento Creation Status
 2. Updates from spec editors meeting:
 - a. [External Content: Redirect or Proxy?](#)
 - i. Client request: PUT or POST:
 - External-Content: <some-URI>; content-type=<some-content-type>
 - Prefer: external-content-handling=<copy|redirect|proxy>
 - Response
 - Preference-Applied: external-content-handling=<copy|redirect|proxy>
 - Fedora advertising support
 - Accept-External-Content-Handling: <copy|redirect|proxy>
 - b. Other spec changes the sprinters should know about?
3. ?

Ticket Summaries

1. Please squash a bug!

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

2. Tickets resolved this week:

key summary type created updated due assignee reporter priority status resolution

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Tickets created this week:

key summary type created updated due assignee reporter priority status resolution

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Minutes

Alignment Sprint 1 Progress Report

1. Sprint is moving along well
2. No additional sprint call this week

Memento

1. Currently able to create Mementos for binaries and containers
 - Only if SMTs are not provided
2. Question: How to import historical containers, including SMTs
 - Must be able to overwrite: timestamps, creators, containment, etc
3. Issues around creating binaries and their descriptions
 - Can they be created separately?
 - Do binaries and descriptions share the same Memento in the timemap?
 - Binaries and descriptions could have independent timelines
 - Suggestion: Have independent timemap endpoints for binary and description
 - Suggestion: Consistent approach to scenarios with and without Memento-DateTime
4. References to other objects should be translated to literals

Separate tickets

1. Creating Mementos when not providing Memento-Datetime
 - no body
2. Converting dynamic properties to static properties

Other

1. ACTION: BenP to submit an initial, minimal PR for creating no-body LDPRV's

Updates from spec editors meeting

1. Discussion of handling external-content
 - See: <https://github.com/fcrepo/fcrepo-specification/issues/338>

Action Items

- [Danny Bernstein](#) to look for JIRA ticket around changing interaction model type.
- [Danny Bernstein](#) to touch base with Peter and Aaron regarding the Resource Authorization portion of the delta spec.
- [Jared Whiklo](#) to create issue for the pass/fail on the Compatibility Test Suite
- [Danny Bernstein](#) reach out for more documentation/testing people.
- [Danny Bernstein](#) determine whether there is any case where a PUT on a TimeMap would make sense. If there is it should be raised with the specification editors.
- [Peter Eichman](#) to do a short writeup on the use of userAgent and groupAgent base URI's and their relationship to WebAC in order to clarify whether or not what if anything needs improvement/clarification/alignment. [ACL Agents - Strings vs. URIs](#)
