

Partners

Established in 2009, [DuraSpace](#) is an independent 501(c)(3) not-for-profit organization providing leadership and innovation for open technologies that promote durable, persistent access to digital data. More than eighteen hundred institutions use and help develop open source software in partnership with DuraSpace.

[VIVO](#) is a software and open source community that provides an integrated view of the scholarly work of an organization. It supports linked and open data capability, maps data to the VIVO-ISF ontology, and facilitates presentation and querying of scholarship data. DuraSpace is VIVO's organizational home.

[Research Graph](#) is an open collaborative project that builds capability for connecting researchers, publications, research grants and research datasets. It leverages graph clusters of the Data Description Registry Interoperability (DDRI) working group under the banner of the Research Data Alliance (RDA).
