ISNI API use cases

Harvard

- Person and organization lookups in Vitrolib (in progress)
    - Browsing and selecting from existing identities through another application
    - Possibly creating identities as needed
- Triage for HFA director names cataloger workflow (experimented)
    - Checking whether identities may already have been created
- Person identity submissions from OAQ (just starting)
    - Creating new identities or adding new data points to existing identities in batch
- Person (and organization?) lookups in OAQ (future)
    - Facilitating self-identification with identities
- Use of ISNI URIs in MARC (under discussion)

Stanford

- Person identity submission
    - Creating a few new identities of video game creators via ISNI Atom Pub API (done)
    - Creating a few new identities of video game creators by uploading a cvs file (waiting for instructions)
    - Creating new identities of video game creators as provided from Mobygames in batch via ISNI Atom Pub API / uploading a cvs file (under discussion)
