

# 2018-05-01 - VIVO Development IG

## Date

01 May 2018

## Call-in Information

Time: 11:00 am, Eastern Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://duraspace.zoom.us/j/823948749>
- Or iPhone one-tap :
  - US: +14086380968,,823948749# or +16468769923,,823948749#
- Or Telephone:
  - Dial(for higher quality, dial a number based on your current location):
  - US: +1 408 638 0968 or +1 646 876 9923 or +1 669 900 6833
  - Meeting ID: 823 948 749
- International numbers available: [https://duraspace.zoom.us/join?m=Qy8de-kt6W4fMMDQCAV\\_3qfH1W-lxAo5](https://duraspace.zoom.us/join?m=Qy8de-kt6W4fMMDQCAV_3qfH1W-lxAo5)

## Slack

- <https://vivo-project.slack.com>
  - Self-register at: <https://goo.gl/forms/JxQFkut4TYj4Ehww1>

## Development Process

- See <https://github.com/vivo-project/VIVO/wiki/Development-Processes>

## Attendees

[blocked URL](#) Indicating note-taker

1. [Ralph O'Flinn](#)
2. [Kitio Fofack blocked URL](#)
3. [Mike Conlon](#)
4. [Muhammad Javed](#)
5. [Marijane White](#)
6. [Jim Blake](#)
7. [Benjamin Gross](#)
8. [Andrew Woods](#)

## Agenda

Last opportunity to discuss before the retrospective meeting.

1. [April Sprint \(Sprint JIRA Board\)](#)

Updates from:

- 1.10 release

Ralph: recommends that it is better to keep the mysql driver maintenance release of mysql driver (5.1.46) instead of the last GA (8.0) release. Ralph will continue watching security vulnerabilities resolution on mysql driver.

Mike: Mysql should not be exposed at least for VIVO scenario where there should be instead a SPARQL endpoint. The known vulnerabilities of mysql driver might therefore mitigated by the context on VIVO. Here are the links to both releases of mysql connector-J <https://dev.mysql.com/doc/relnotes/connector-j/5.1/en/>, <https://dev.mysql.com/doc/relnotes/connector-j/8.0/en/>

Distribution API, there is no one against it's inclusion in the VIVO Code as Graham is absent.

Mike: VIVO is not dependant on Distribution API unless the installation is customized to use it.

Jim: The project is open source so there is no emergency in integrating that API into VIVO since one can always integrate it into his installation.

There are many pending PR on Vitro/VIVO to be reviewed.

VIVO ontologies

1. Javed VIVO Ontology & ontologies.owl are merged. Migration from VIVO 1.9 to 1.10 has been tested and requires no effort
2. Mike: any person who seems unsure can give a try
3. VCard Ontology update will not change anything in the application during this sprint. The work planned on that issue is all done.

#### Multi-Language support

1. The issue generated PRs on VIVO, Vitro, Vivo-languages and sample-data
  2. Benjamin: The PRs on VIVO-1451 can't found on the vivo-project repository; Kitio will make sure to put the links in the corresponding JIRA ticket.
- b. Tickets [In-Review piling up](#)
- c. [1.10 PR-freeze and code-freeze](#)
- i. Deadline for a pull request submission: April 30th, 2018 12am PST.
    - \* Pull requests submitted after April 30th will be considered for later release.
  - Deadline for Code freeze: May 10th, 2018 12am PST.
    - \* Any code that is not merged in dev branch by May 10th, may not go in ver 1.10 and will be considered for later release.
1. On-going sprints, see [2018 Sprint Schedule \(For Discussion\)](#)

What would be pace the team can commit to ? One sprint each month or each quarter.

Mike: We can have a flexibility to say a planned sprint is not going to happen. Other participants are interested in coming into sprints but they need a schedule.

Javed: We need a schedule in order to have institutions committed and build the community. There are issues to meet in terms of resources (Sprint leaders, Task leaders, developers) and corresponding task.

Andrew: Having a schedule with no commitment might end up in new participants alone on a sprint.

Kitio: Suggest keeping a ad-hoc mode as we did for the first sprint.

## Notes
