more details» copy to my calendar

Attendees

- Mike Conlon
- Anna Kasprzik
- Tatiana Walther
- Christian Hauschke
- Ralph O'Flinn
- Anna Kasprzik
- Juliane Schneider
- Muhammad Javed

Agenda

- 1. Sprint 1 remainders
- 2. Sprint 2 work
- 3. Ontology unconference sessions at the VIVO Conference
 - a. Conference schedule http://vivoconference.org/schedule/
 - b. Possible ontology sessions http://bit.ly/2Kpl7pV
- Documentation
- 5. Enabling multiple identities with vCards? (Christian)

Notes

Conference schedule (Mike)

- Ideas for unconference sessions: https://docs.google.com/document/d/1iMiht PhgY8PAVmjMHKSWkwW9GjDaeB65nVnEN6vmpM/edit
- Ontology task force members are uncomfortable with the schedule for unconferences. All-unconference slots would be preferred to not compete
 with prepared sessions. General concern with the conference schedule. Competing with prepared sessions is a problem. Ontologists will write
 emails to conference planners. Try to find times to meet that are not in competitition with prepared sessions.
- · Ideas: Day 2 before the poster reception (Ralph)
- Meet during lunch (Tatiana)
- Day 1 in between the workshops (Christian)
- Shortening the lunch breaks (Ralph)
- Idea: Asking for complete re-scheduling. Compress the prepared-material-sessions to a three track conference. (Mike)

Sprint 1 (Javed)

- https://wiki.duraspace.org/display/VIVO/Sprint+1+-+Proposed+Tasks
- VIVO.owl task was completed and merged
- Checking vCard ontology finished and reviewed.
- Identify candidate ontology modules for possible removal.
 - Modules to review separate files created
 - o makes legacy entities available in modular files
 - Google Drive Folder: https://drive.google.com/open?id=1SE8ZMzRk8wdaJUrEdF-CTcDo1TynlY8c
 - Mike is happy to review the files
- Reworking the firsttime approach should be discussed by the developer call. It's maybe no longer necessary as a caching solution
- Mike used Wilma because it's the default theme
- o Ralph: tenderfoot should not be used. Everything should be tested with Wilma.

Enabling multiple identities with vCards (Christian)

- 2 different objectives:
 - o reproducing the authorships as a text string "as published" in the original publication
 - o enabling people to have multiple identities
 - O Mike: Data preserving idea
 - o Ralph: Why not keeping multiple identities (list of a.k.a.)
 - Mike: We had also know as in the early VIVO days
 - There is a data property namePublishedAs that can be associated with the authorship
 - Behaviour of the system should be improved. A.k.a. should be integrated in the researchers profile
 - O Mike: Getting names right is important to the people who have names. And that's all of us.
